欢迎辞

尊敬的各位嘉宾、各位同仁和朋友们：

十月的北京，金风送爽、漫山红遍，在这收获的季节里，我们又一次迎来了中国癫痫学术领域的盛会——第二届北京国际癫痫论坛。

在此，我谨代表中国抗癫痫协会和第二届北京国际癫痫论坛组委会，对前来参会的各位嘉宾表示热烈的欢迎和诚挚地问候！

中国抗癫痫协会在成立一年多的时间里，通过老中青三代专家的积极努力和秘书处全体工作人员的辛勤工作，得到了国内癫痫学界的认可和支持，全方位的工作逐步展开。协会主持编写的《临床诊疗指南癫痫分册》将于近期由人民卫生出版社出版，《中国癫痫杂志》已在国家新闻出版总署审批中，目前协会正在组织专家编写“中国癫痫防控战略绿皮书”。

经中国抗癫痫协会第一届理事会讨论决定，2004年创办的“北京国际癫痫论坛”作为协会组织的国际性专科学术论坛每两年举办一次。它为我国癫痫领域专业人员提供一个高起点、高水平的学术交流平台，通过这个平台，将对全球癫痫临床治疗、基础研究与社会关爱等领域的最新进展和全球抗癫痫运动最新成果及时进行交流，因而必将对提高我国癫痫防治水

平、治疗规范化及消除社会对癫痫病人的偏见起到积极的促进作用。

本次论坛，有国际、国内二十余名癫痫学领域的具有重要影响力的专家进行专题演讲，全国 300 余名专业工作者积极报名参会，并提交论文进行现场交流。论坛期间，还安排了专场“中国韩国癫痫研讨会”和“海峡两岸病例讨论会”，癫痫病友会启动仪式也将在论坛期间举办的大型癫痫患者公益活动中进行。

我衷心希望，大家都来关心和促进论坛的进步，支持和帮助协会的发展和建设，我更期待着，大家此行有更多的收获，愿您度过一段美好的时光！

Welcome Message

Distinguished guests, colleagues and friends:

October in Beijing, a golden harvest season of “autumn high and air brisk” with red maple leaves dyed hills, we have our Second Beijing International Epilepsy Forum (2nd BIEF) – a grand academic meeting of epileptology in China.

On behalf of the China Association Against Epilepsy (CAAE), the Organizing Committee of the 2nd BIEF, and Dr. Chong-Tin Tan, the Co-Chairman of the 2nd BIEF may I extend my warm welcome and sincere greetings to all of you.

In the past year since the CAAE established, thanks to the big efforts of the epileptologists in different generations and hard working of the CAAE secretariat, the CAAE got more and more supports and recognitions by the academic societies in epileptology and worked in wide aspects. The “Clinical guidelines for diagnosis and treatment of epilepsy” is going to be published very soon, the “China Epilepsy Journal” is under process of approval, a “green book” of the epilepsy prevention and control strategies in China is under writing and compiling, etc.

Decided by the first meeting of the CAAE Executive Council, the 2004 borned BIEF will be held every two years. It provides a high level academic exchange platform to the epileptologists in China and internationally. Through this platform, we may exchange the most recent advances in the diagnosis & treatment, basic research, social care, etc on epilepsy from all over the world and the achievements of the

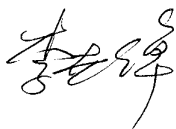

Global Campaign Against Epilepsy. These will surely promote the raise of the level of epilepsy prevention and control, standardization of the clinical treatment, and removal of social prejudice to epileptics in China.

In the present Forum, there will be more than 20 well-known experts in epileptology from international societies and China to make presentations in specific topics. More than 300 epileptologists participate in the Forum and present scientific papers. At the same time, a China-Korea bilateral workshop on epileptology and a Case-consultation by experts from both side of Taiwan Strait will be held. In addition, an inauguration of patients-care activity (as IBE) will be implemented as well during the 2nd BIEF.

I sincerely hope that all of you would show your concern and support to the development of the BIEF, as well as the CAAE. I also hope that you would have a fruitful trip and good time during your participation in this Forum.

President, CAAE

Co-Chairman, 2nd BIEF

Parallel Sessions

Thursday, October 26, 15:15—17:00

Session A: Special aspects in clinical practice for epilepsy

Moderator: Huang Xishun, Ren Hui

- 15:15-15:30 Pseudoseizures Zhu GuoXing
- 15:30-15:45 Comparison of Frontal Lobe Epilepsy and Temporal Lobe Epilepsy—A study of 549 cases
Peng Bingwei
- 15:45-16:00 Change on treatment gap of epilepsy after intervention in five rural areas of China
Wang Wenzhi
- 16:00-16:15 Clinical Analysis of 161 Patients with Epilepsy After Stroke
Jiang Hua-an
- 16:15-16:30 The Electroclinical Characteristics and Treatment of Rasmussen Syndrome in 16 Children
Zhang Yuehua
- 16:30-16:45 Nocturnal Frontal Lobe Epilepsy:A Mongolian Family with two Affected Members
Chen Yan
- 16:45-17:00 The Clinical Data of 32 Cases with GEFS+ And Contrast Analysis with Other Types of Epilepsy
Meng Haijiao

Session B: New AED therapies for epilepsy

Moderator: Cai Fangcheng, Zou Liping

- 15:15-15:30 Clinical Features of Severe Myoclonic Epilepsy in Infancy in Chinese
Liu Xiaorong
- 15:30-15:45 Multicenter Randomized, Double-Blind, Placebo-Controlled Trial of Levetiracetam as Add-on Therapy in Patients with Refractor Partial Seizures
Yu Peimin
- 15:45-16:00 Systematic Review on the Treatment of TCM for Epilepsy in the Recent 10 Years
Liu Jinmin
- 16:00-16:15 Preliminary Observation of Ketogenic Diet Therapy for Chinese Children with Intractable Epilepsy.
Liao Jianxiang
- 16:15-16:30 Choice of anti-epileptic drugs in some special conditions of epilepsy treatment.
ao Xiaoqiu
- 16:30-16:45 Outcome Research for Anti-epileptic Drug Treatment in 637 Cases of Epileptic Seizures: Follow-up for Above Half to Five Years
Zheng RongYuan
- 16:45-17:00 Neuroprotection of Lamotrigine and Valproate Sodium after status epilepticus and their effects on secondary epilepsy
Wang Benguo

Session C: Case Consultation (cross the Taiwan Strait)

15:15—17:00 Moderator: Wu Xun, Yang-Hsin Shih

Saturday, October 28, 13:30—17:00

Session A: Advances in researches on pathological mechanisms of epilepsies

Moderator: Chi Zhaofu, Ye Lumei

- 13:30-13:45 The mutation Screening of SCN1A gene in generalized Epilepsy with febrile seizures plus and severe myoclonic epilepsy in infancy
Sun Huihui
- 13:45-14:00 Studies of differential expressed genes of epileptogenic cortex: fluorescent differential display PCR analyses
Zhou Jian
- 14:00-14:15 Screening and analysis on variants in the CACAN1H gene in childhood absence epilepsy
Liang Jianmin
- 14:15-14:30 The expression of Eph in hippocampus of rat temporal lobe epilepsy
Liu Weiping
- 14:30-14:45 Association between the C3435T polymorphism in the human multidrug resistance (MDR1) gene and response to antiepileptic drug treatment in the south of China
Lu Junchao

- 14:45-15:00 The role of P-glycoprotein-mediated transport of phenytoin and carbamazepine in a multidrug resistant K562
Zhao Yongbo
- 15:00-15:15 Alterations of MAPKKK5 gene expression in human cryptogenic refractory temporal lobe epilepsy
Zuo Gang
- 15:15-15:30 Effects of topiramate on seizure susceptibility in kainate-kindled rats: involvement of peripheral-type benzodiazepine receptors
Chen Chunfu
- 15:30-15:45 CA2: the most vulnerable sector to bicuculline exposure in rat hippocampal slice cultures
Han Chunxi

Session B: Surgical treatment and pre-operational assessment

Moderator: Tan Qifu, Fu Xianming

- 13:30-13:45 The value of lateralization of epileptic foci
Comparing the interictal and ictal EEG, MRI
and semiology in mesial temporal lobe epilepsy
Li Liping
- 13:45-14:00 Cortex electrical stimulation in presurgical

- evolution for treatment of intractable epilepsy
Zhang Hua
- 14:00-14:15 Surgical treatment for non-lesional intractable focal epilepsy-When is intracranial electrode implantation not necessary
Cai Lixin
- 14:15-14:30 Joint application of magnetoencephalography and video electroencephalogram for locating epileptogenic zone
Zhao Wenqing
- 14:30-14:45 Surgical treatment for perirolandic refractory epilepsy
Zhang Guojun
- 14:45-15:00 Clinical features of hippocampal lesions: report of 21 cases
Sun Zhenrong
- 15:00-15:15 Surgical treatment and outcome of multi-foci epilepsy
Li Yunlin
- 15:15-15:30 Surgery of pediatric patients with intractable epilepsy syndromes.
An Ning
- 15:30-15:45 Surgical Treatment of Intracranial Arachnoid Cyst with Epilepsy
Yao Qinghe
- 15:45-16:00 Surgery for the treatment of intractable occipital lobe epilepsy: report of 18 cases.
Wang Huanming

Session C: Diagnostic technology, special treatment, epidemiology

Moderator: Jianzhong Wu, Yuxi Liu

- 13:30-13:45 The Specific Performance at High Perfusion Area in Inter-ictal SPECT of Pediatric Epilepsy (189 Cases)
Wang Weimin
- 13:45-14:00 MRI scan in diagnosis of temporal lobe epilepsy with hippocampal sclerosis
Guo Hui
- 14:00-14:15 Application home video to diagnose of epilepsy
David D. Wang
- 14:15-14:30 The effect of different eye states and intermittent photic stimulation on the epileptiform discharges in children epilepsies
Yang Zhixian
- 14:30-14:45 Analysis of levels of serum ACTH and Cortisol and of the EEG shortly before as well as after epileptic seizures during sleep
Zhang Shouwen
- 14:45-15:00 Treatment of Gamma Knife radiosurgery for drug-resistant mesial temporal lobe epilepsy
Zhou Wenjing
- 15:00-15:15 Vagus Nerve Stimulation for the treatment of intractable epilepsy
Ling Zhipei
- 15:15-15:30 Changes of knowledge, attitude and practice of patients with epilepsy and their family members

after intervention

Zhao Donghai,

15:30-15:45 Epidemiological survey on epilepsy in Ji Nuo
ethnic minority groups in Yun nan province
